4. PSC

The PSC met on a monthly basis throughout the year. Notes from these various meetings were recorded and shared publicly: <https://github.com/qgis/QGIS/wiki/PSC-Meetings-archive>

The PSC meetings included occasional participation from QGIS community members who had specific issues to raise. We encourage all QGIS members to make use of the opportunity to raise issues for our meeting agendas, or to join the PSC meetings if something needs to be discussed.

5. Votes and elections

At 1.1.23 The elected members consisted of 30 Group voting members (<https://qgis.org/en/site/forusers/usergroups.html>), 30 Community voting representatives, two honorable voting members and 1 OSGEO voting member.

New users groups of 2023 are:

- None

New community voting member of 2023 are:

- None

Grant Programme

The [QGIS Grant Programme in 2023](#) resulted in [funding for 6 proposals: 4 in the first round](#) and [2 in the second round](#). Like in the previous year, we did not accept proposals for the development of new features. Proposals had to focus on improving the QGIS project infrastructure and polishing existing features. The target version for all project work was QGIS 3.34. Reports from the 2023 winning proposals will be published on the QGIS.ORG blog.

6. Financial

The annual financial report for 2023 is provided as a separate PDF document, and will be published after acceptance at <https://qgis.org/en/site/getinvolved/governance/finance/index.html> - the accounting was checked by two external auditors. See separate PDF for financial auditing report.

7. Thanks

As you can see from the summary above, 2023 was yet another incredibly busy and productive year for the QGIS project. With major advances in our organisation structure, code base,

community and revenue, QGIS continues to grow from strength to strength and we look forward to maintaining the same momentum through 2024. The PSC would like to thank all of the coders, documentation writers, people supporting other users in the community, sponsors, donors, translators, bug reporters, promoters and users that have made QGIS the hugely successful project that it is today.

On behalf of the PSC: Marco Bernasocchi, Anita Graser, Alessandro Pasotti, Andreas Neumann, Jürgen Fischer, Régis Haubourg, and Tim Sutton.

Best regards,

Marco Bernasocchi
